

8th World Congress on Targeting Mitochondria

World Mitochondria Society

Targeting Mitochondria 2017

October 23 - 24, 2017 - Berlin, Germany

www.targeting-mitochondria.com

Welcome to Targeting Mitochondria 2017

Dear Colleagues,

I am pleased and very honored to announce on behalf of the Scientific Committee of the World Mitochondria Society the 8th World Congress on Targeting Mitochondria which will be held in Berlin, Germany, on October 23-24, 2017.

The general and overarching topics our 8th World Congress on Targeting Mitochondria is going to cover will not significantly deviate from topics discussed at preceding editions of our conference series. We will again focus on three major areas, which are first the role of mitochondrial dysfunction in etiology and pathogenesis of chronic diseases including aging, second how to assess and above all quantify mitochondrial dysfunction in vitro and in vivo and finally, third, how to target and manipulate mitochondrial function in order to develop future mitochondria-based therapies.

The progress made in Mitochondrial Medicine over the last few years is breath-taking. Our detailed knowledge about how mitochondria impact human health and longevity has been rapidly growing, so has the number of mitochondria-based clinical trials.

For the 8th edition of "Targeting Mitochondria", the scientific committee will invite again key players, i.e. investigators who have been pushing the progress in their particular field of mitochondrial research over the last few years. Basic researches working at the bench in the laboratory, physicians treating patients suffering from mitochondrial disorders as well as representatives of companies working on the commercialization of mitochondria-targeted therapies are all welcome to our conference. We are convinced that our 8th World Congress on Targeting Mitochondria will be at least as exciting and as successful as our previous meetings.

Hot topics which are going to be highlighted this year include among others:

Recent advances on mitochondrial dysfunction in etiology and pathogenesis of human diseases and aging

- Mitochondria & Ageing
- Mitochondria & Microbiota: the intriguing relationship
- Mitochondria & Redox Regulation
- Mitochondria & Viral Infection
- Mitochondria & Metabolic Syndrome
- Mitochondria & Neurodegenerative Diseases
- Mitochondria & Cancer

The challenge of qualitative and quantitative assessment of mitochondrial function in vitro and in vivo

- Mitochondria Quality Control
- Mitochondria Devices: New methods to detect mitochondria dysfunction
- Mitochondria as Biomarkers
- Presentation of Practical Cases

Recent Advances on targeting mitochondria: Clinical trials and potential mitochondria-based therapies

- Strategies to target Stem Cells
- Strategies to target Microbiota
- Strategies to target miRNA
- Strategies to reimplace mitochondria
- Clinical & Therapeutic Directions

We very much look forward to seeing you in Berlin for this exciting event.

Volkmar Weissig

President of the World Mitochondria Society

Marvin Edeas

Chairman of the Targeting Mitochondria 2017

8th World Congress on
Targeting Mitochondria

October 23-24, 2017 – Steigenberger Hotel, Berlin, Germany

Day 1 – Monday, October 23

8h00 Welcoming & Registration of Attendees

8h55 Welcome Introduction by Pr Volkmar Weissig, President of the World Mitochondria Society

Session 1: Targeting Mitochondria 2017: Recent Advances on Mitochondrial Dysfunctions in Chronic Diseases: The Mechanistics

9h00 Mitochondria: a switchboard between various cell death modalities
Vladimir Gogvadze, Karolinska Institute, Sweden

9h25 Hydrogen sulfide and mitochondrial function
Csaba Szabo, University of Texas, USA

9h50 Targeting mitochondria by small RNAs: update and prospects
Ivan Tarassov, University of Strasbourg, France

10h15 Mitochondrial ROS mediated signaling pathways: activation and regulation upon inflammation
Andrey Kozlov, L. Boltzmann Institute für experimentelle und klinische Traumatologie, Austria

10h40 Coffee Break & Poster Session

11h10 Mitochondria and Alzheimer's disease
Natalia Stefanova, Institute of Cytology and Genetics, Russia

11h35 Mitochondrial ROS and longevity: Recent scientific advances
Ana Lechuga-Vieco, Fundación Centro Nacional de Investigaciones Cardiovasculares, Spain

12h00 Regulation of cardiac excitation-contraction-bioenergetics coupling by mitochondrial fission protein Drp1
Shey-Shing Sheu, Thomas Jefferson University, USA

12h25 Lunch Break & Poster Session

Session 2: How to Evaluate Mitochondria Function/Dysfunction?
Presentation of Practical cases / Methods & devices in the market: critics and limits

14h00 Introductory comments
Egbert Mik, Erasmus MC, The Netherlands

14h25 Probing Mitochondrial Chemical Biology with Organelle-Specific Peptides
Shana O'Kelley, University of Toronto, Canada

14h50 Testing the therapeutic potential of antioxidants in diverse disease models
Marten Szibor, University of Helsinki, Finland

15h15 High-content mitochondrial analysis by live-cell microscopy
Werner Koopman, Radboudumc University, The Netherlands

15h40 Coffee Break & Poster Session

16h40 Short Oral Presentations for Sessions 1 & 2 (7 minutes of presentation + 3 minutes for questions)
Don't forget to submit your abstract before September 14.

18h30 End of the first day

20h00 Targeting Mitochondria Dinner
To participate, please register online.

Day 2 – Tuesday, October 24

8h55 Opening of the second day

Session 3: Strategies to target Mitochondria: Recent Clinical & Potential Therapeutic Studies (part 1)

Strategies to target stem cells / Strategies to replace mitochondria / Clinical & Therapeutic Directions

9h00 Mitochondria-targeted rechargeable antioxidants as pharmaceuticals inhibiting the aging program in humans

Maxim Skulachev, Moscow State University, Russia

9h25 The impact of mitochondria-targeted antioxidants on cancer progression

Martin Bergö, Sahlgrenska Cancer Center, Sweden

9h50 Prevention of mitochondrial disease transmission

Yuko Takeda, The Newcastle University, United Kingdom

10h15 Polymeric nanoparticle-based mitochondria-targeting systems

Han Chang Kang, The Catholic University of Korea, The Republic of Korea

10h40 Coffee Break & Poster Session

11h40 mtDNA induced inflammatory response in lungs: recent scientific advances

Bartosz Szczesny, University of Texas Medical Branch at Galveston, USA

12h05 iPSC-based drug discovery for neurological mitochondrial disease

Alessandro Prigione, Max Delbrueck Center for Molecular Medicine, Germany

12h30 Quantifying mitochondrial uptake of nucleobase derivatives through click chemistry

Kurt Hoogewijs, The Wellcome Trust Centre for Mitochondrial Research, Newcastle University, United Kingdom

12h55 Coffee Break & Poster Session

14h00 Mitochondria targeted diagnostic and photodynamic therapy

Sabyasachi Chakraborty, Max Planck Institute, Germany

14h25 Human mitochondrial leucyl tRNA synthetase can suppress non cognate pathogenic mt-tRNA mutations

Hue-Tran Hornig-Do, University of Cologne, Germany

14h50 Short Oral Presentations for Session 3

Don't forget to submit your abstract before September 14.

15h30 Coffee Break & Poster Session

16h00 Short Oral Presentations for Session 3

Don't forget to submit your abstract before September 14.

17h00 Discussion & Concluding Remarks by Marvin Edeas & Volkmar Weissig

Targeting Mitochondria 2017 Awards

17h30 End of Targeting Mitochondria 2017
